

TrueFan AI: Scalable Video Engagement for Enterprises

Purpose

To showcase how TrueFan AI is transforming enterprise communication through scalable, personalized, and multilingual AI-generated video content.

Key Takeaways

- TrueFan AI enables enterprises to create personalized, AI-generated videos at scale, boosting engagement and adoption rates by **60%**.
- Videos are replacing text-based communication in customer, dealer, and employee journeys across BFSI, healthcare, retail, and more.
- The platform supports **145+ enterprises**, including HDFC, ICICI, Bajaj Finance, SBI Life, and Zomato, and works with **200+ celebrities**, including Shah Rukh Khan, Virat Kohli, and Rishabh Pant.
- AI avatars of CEOs and celebrities allow companies to deliver consistent, on-demand communication without repeated filming.
- A major use case includes **collections in BFSI**, where AI video nudges reduce delinquency through empathetic, escalating reminders.
- Video production cost has dropped dramatically—from **₹50-60 lakhs** for a traditional TV ad to **~₹3 lakhs** using AI—with faster time-to-market (e.g., films created in **5 days**).
- Clients like **Bajaj Finance** have created **1.7 million videos** in **18 months**, renewing contracts for **10 million videos**, indicating rapid enterprise adoption.
- The next frontier is **synchronous AI video**, where users can have real-time, two-way video conversations with AI avatars for services like banking, insurance, or coaching.

Video as the Future of Engagement

TrueFan AI was founded in **February 2020**, just before the pandemic, with the vision that video is the most powerful medium for human communication. While in-person interaction is ideal, it's not scalable. Video is the next best thing—especially when powered by AI.

The company started by cloning celebrity faces and voices (e.g., **Rishabh Pant for MakeMyTrip**) to create personalized customer outreach. These AI videos replaced text messages (e.g., WhatsApp) with **video nudges**, increasing ad ROI and customer engagement.

Enterprise Transformation with AI Video

TrueFan AI powers both **external** (customer, dealer, distributor) and **internal** (employee, field force) communications. Previously text/email-based, these are now being converted to localized, **multilingual AI videos** tailored to audience segments.

Case Study: Adani Wilmar

- Used **mass email in English** to communicate incentive schemes to **35,000 distributors** nationwide.
- Switched to **localized AI videos** featuring celebrities or CEO avatars in regional languages.
- Result: **Adoption increased by 60%**, with click-throughs rising from ~10K to ~22K users.

Case Study: Axis Max Life Insurance

- CEO **Sumit Madan** created an AI avatar to communicate with agents and MDRT winners.
- Multiple avatars (formal, festive, casual) allow personalized, season-relevant messaging.
- Trendset for future **investor updates and leadership communication via video**.

Collections in BFSI

- Loan recovery is a major challenge-easy to lend, hard to collect.
- TrueFan AI deploys **tiered video messages**: starting gentle, escalating to legal warnings.
- Example: A customer past **90 days overdue** receives a stern video stating their loan is marked **NPA** and legal action has begun, affecting **CIBIL score**.
- Messages are **personalized, multilingual, and avatar-driven**, with different personas for different customer cohorts (age, purpose, etc.).

Case Study: Shriram Life Insurance

- Created a **TV-commercial-grade AI video** featuring **Rahul Dravid** conversing with a customer about flexible insurance policies.
- Production cost reduced to **~₹3 lakhs** (10-15x cheaper)
- Can generate **multiple versions** for different products and translate into **8+ languages**, enabling **20+ variants** from one concept.
- Eliminates need for **planning, production, or reshoots**-content is on-demand.

Behind the Technology

- Founded **six years ago**, before the AI boom, with early work in **deep learning, neural networks, and facial cloning**.
- Raised **₹200 crores**, now owns **90% of the AI video market** in India.
- Has generated **2 crore AI videos** in the last year alone.
- Clients include **Cipla, Sun Pharma, Reliance, Tata, Adani, and Novo Nordisk**.

Celebrity and Brand Partnerships

- Worked with **200+ celebrities**, including Amitabh Bachchan, Shah Rukh Khan, Ranveer Singh, and cricketers.
- Conducted **90% of celebrity education internally**, explaining AI's value in multiplying their time.
- First celebrity avatar: **Ranveer Singh (October 2020)**.
- Brands like **SBI Life** signed **Ravindra Jadeja and Rishabh Pant** for **3-year AI rights**, producing **900+ videos** for marketing, HR, and employee engagement.

The Future: Synchronous AI Video

- Next step: Moving from **asynchronous** (push) to **synchronous** (pull) video.
- Demo showed real-time interaction with a **Bajaj Finance AI video agent** in Hindi:
 - User asks about loan options.
 - AI responds with rate, tenure, EMI (**9.5%, ₹21,000/month**).
 - Guides through KYC: pan card scan, liveness check.
- Not yet live, but **deployment is imminent**.
- Vision: Every individual will have a **digital avatar** for communication-like a relationship manager, teacher, or doctor.
- Future presentations may be delivered by **AI avatars**.

Action Items / Next Steps

- Continue scaling AI video production for enterprise clients.
- Deploy and launch **real-time, interactive AI video agents**.
- Expand use cases across **healthcare, education, and government**.
- Onboard more brands and celebrities for long-term AI rights partnerships.
- Enhance multilingual and multi-avatar personalization capabilities.
