

TrueFan AI: Scalable Video Engagement for Enterprises

[0:01] Learned a lot, changed the arc of my career.

[0:04] Came to Bombay as a young lad back in 2015, 22nd June, one of the heaviest rainfall days in this decade.

[0:14] Started with a consulting firm called Parthenon, boutique consulting firm based out of the US.

[0:20] Now they're part of EY.

[0:22] Traveled to over 18 countries in one year because we used to do global work.

[0:27] Post that, moved to Wavre Pincus.

[0:29] which is one of the large private equity funds in India, obviously globally.

[0:36] Spent two years there, used to cover technology, BFSI, because that's the 40% of stock market.

[0:43] Met a lot of entrepreneurs, learned that whatever they are doing, they are doing it from this soil, no one has come from Mars.

[0:51] So, you know, decided to quit, start up our company called TrueFan AI.

[0:58] We should get the award for best timing because we started our company in February 2020, a month behind COVID, right?

[1:07] And then obviously things stalled by.

[1:10] So we'll get into presentation.

[1:12] We'll talk about what we're doing.

[1:15] It's not on the screen yet.

[1:17] I think I'm presenting, but it's not on the screen.

[1:24] Yeah, good.

[1:26] So what are we doing?

[1:27] We are doing future of AI is video, right?

[1:31] Why is it video?

[1:33] See, the best form of communication happens in person.

[1:36] We're all in person.

[1:37] So, you know, I'm able to talk to you.

[1:39] You are giving your time.

[1:40] I am, you know, spending that time.

[1:43] But unfortunately, in person is not scalable.

[1:47] For how many times can we all be in this room again, like the way we are?

[1:51] Answer is never again, right?

[1:52] It's not gonna happen ever.

[1:54] We'll never be the same set of people being in this room again.

[1:58] Therefore, in-person time is not scalable.

[2:01] The next best alternative is video.

[2:04] After that is voice, and after that is text, right?

[2:10] So text is easiest, then comes voice, and then comes video.

[2:22] Let us play some videos for you, you know, and ours is a business which is a lot more show than tell.

[2:29] So I'll play some videos for you and you know, then we'll talk more through this.

[2:35] Sound, it needs to work.

[2:40] Sorry, technically, it's not, the AV is not connected.

[2:43] Don't worry, I'm used to it, happens always.

[2:52] That's the fun with technology, right?

[3:01] You can click on what power here.

[3:04] You can use this.

[3:29] I can use the laptop.

[4:04] Last one.

[4:11] This clicker will work?

[4:12] No.

[4:13] So I can use keyboard?

[4:15] Keyboard, good.

[4:16] Yeah.

[4:17] So back to the basics, right?

[4:21] So let's play a couple of videos for you and then we get started, right?

[4:28] हैलो भरत होप यू अरे डूइंग वेल हैलो शिवान होप यू अरे डूइंग वेल हैलो सौम्या होप यू अरे डूइंग वेल जैसे लास्ट ओवर तक मैच नहीं छोड़ते, वैसे ही अपने होटल की बुकिंग को लास्ट मिनट के लिए नहीं छोड़ते। अपनी लखनऊ ट्रिप के लिए, अपनी ऋषिकेश ट्रिप के लिए, अपनी दिल्ली ट्रिप के लिए बुक करो ये अमेजिंग गार्डन क्यूँ स्टे, अमेजिंग लेक क्यूँ स्टे, अमेजिंग सिटी क्यूँ स्टे ओनली ऑन.

[4:53] बुक करो होटल पर.

[4:55] बुक करो ये पूरा वीडियो एआई से बना है। our man, the video Rishabh Pant, with him I recorded a 5 minute video on camera, took his face, took his voice, cloned it in common language, and now our client, MakeMyTrip, which is the largest travel company in the country, every communication that they do is through video, right?

[5:18] So let's say we're trying to book a flight as a customer, and at the last minute we say, "Let's leave it, we'll talk later."

[5:24] So marketing will call you an abandoned cart customer and they will get a message saying Nimesh, hi, 500 rupees off on your next booking.

[5:32] And you get a WhatsApp message that you archive.

[5:34] What they are doing now is those texts are being replaced with video, by video, because video is the most important form of engagement, the best form of engagement possible.

[5:47] And therefore, they see higher return on ad spends.

[5:51] They can, marketing can tell a better story.

[5:52] They can communicate far better with the customer.

[5:55] This is applicable to every customer journey, every dealer distributor journey, every employee communication, all imperative, right?

[6:03] I'll play the second video for you and then we go into some more knowledge sharing.

[6:15] Yaar, is saal maine bohot shopping kiya hai.

[6:18] Diwali is here, so a little more shopping is necessary, and as always, Bajaj Finserv, Easy EMI, Unniga, Shri Krishna Enterprises Company, Nunji, Kuttu, Watch, Kunalari, and Kun Rinnankara, Chala, Manchi, Office, Unna.

[6:32] काफी सेल्फ एक्सप्लनेटरी है। एक ऐड फ़िल्म एक भाषा में शुरू होती है।

[7:02] Unfortunately, India is not the same India where only one language matters.

[7:06] You know, every state has different language.

[7:08] We have so many Indians sitting here, all speak different languages, multiple languages, some speak more than three.

[7:14] Communication was always happening in English or Hindi, not anymore.

[7:18] Every single brand now records a video in one language, converts into multiple languages because they want to speak the voice of the customer, voice of the dealer, voice of the agent, right?

[7:28] I just gave you two videos to show you what we do as a company.

[7:32] Where AI video communications platform typically, why does it matter, right?

[7:45] What's the.

[7:47] Our personal life, Instagram, YouTube, Netflix.

[7:57] Our corporate ride is still going on e-mail.

[7:59] We are still reading HR onboarding forms.

[8:03] Max Life Insurance policy is coming.

[8:05] We are reading a 20 page policy.

[8:06] Bernstein Research is publishing.

[8:08] We are reading their long report.

[8:11] But life has changed.

[8:13] Personal life is on video.

[8:15] Nothing on text.

[8:16] Newspaper is gone.

[8:18] News is on Instagram.

[8:19] Professional life is on that.

[8:21] That's changing very fast, right?

[8:23] Because video is the most efficient form of engagement.

[8:27] If you can do it through video, it will be very good.

[8:31] If it is so efficient, then why now?

[8:34] Because AI actually is making videos scalable for the first time, right?

[8:38] Every enterprise has always wanted to do video first in nature, right?

[8:42] If possible, you will always want to do a video first.

[8:45] But video requires what I call production, planning, cost.

[8:50] So, making it, you know, There is a tam-jam to it, right?

[8:53] Instead of me emailing, I can just send a video, and it will be fast.

[8:55] The friction to video, obviously, always sort of what I call limited the demand of it.

[9:01] Go back to the geo era, pre-era when I was in college, I think 1 GB costed about 100 rupees.

[9:06] And you could sort of cap that out on your messages with the partner that you were dating in the college in one day.

[9:14] And after that, you know, Then you know, you just pack in your pocket money.

[9:18] But as internet expanded, the usage, as the cost of sort of internet came down, data came down, usage, you know, went up by 100x.

[9:26] It's called Jovance Paradox.

[9:28] As you reduce the friction of things, their demand will increase in this way.

[9:33] You can't imagine at that time.

[9:36] You will think, we didn't model this much.

[9:40] biggest beneficiary of Jio era was Airtel, where the stock price was

flat for many years.

[9:45] And then now it's like 3x, right?

[9:47] But hindsight 2016, you will say, oh, fuck, you know, internet companies won't make money ever, right?

[9:51] So that's what we believe.

[9:52] We believe that video is the most efficient form.

[9:56] It was always limited by the ability to scale video.

[10:00] AI, and in particular us with AI, changes that forever.

[10:04] Now you're moving in the era where video will be as easy As typing an e-mail, video will become what I call on-demand in nature, right?

[10:12] You will never have to shoot, plan, you know, think about a video six months in advance, or even six days in advance, or even 6 minutes in advance.

[10:20] You can start there.

[10:21] Few customary credentials slide, I would like to talk about it, but we have to.

[10:25] We are six years in the AI business.

[10:27] We were in the AI business before AI became AI.

[10:31] You know, we were advocates of this business, of this technology.

[10:34] Usme usko deep learning bolte the neural network bolte the machine learning bolte the isko nahi samajh me aata toh uske liye cloning, morphing, editing bolte the at the advent of ChatGPT in September 23, it all came down into one umbrella called AI.

[10:50] raised about 200 crores of capital, we own 90% of this market, created 2 crore AI reviews alone in last one year, we work with 145 enterprises in this country, we work with everyone, you know, you pick up bank, we work with an HDFC, an ICICI, a Bajaj, you know, a Shriram, Kotak, DBS, blah, blah, if you pick up insurance, we work with HGC Life, SBI Life, ICICI Pru, Max Life, Universal Sompo,

[11:17] PNB MetLife, etc, etc.

[11:19] Leave BFSI, in healthcare we work with Cipla, Sun Pharma, Mankind, Intas, Dr.

[11:24] Reddy's, Abbott, Novo Nordisk.

[11:26] We work with Reliance, Tata, Adani, Birla, Bajaj, all across the board.

[11:30] Because video is a sector agnostic problem and we kind of cover that.

[11:33] Given our audience is a lot of mutual funds and I was in private equity, I think this slide will impress you more, where we work with all leading sort of companies across every sub-segment of BFSI.

[11:49] And when you are far, meetings are like that, quite frankly, right?

[11:56] Same way, we talk about human communication.

[11:58] We work with every celebrity in this country.

[12:01] Amitabh Bachchan, who is like, we have worked with him, so we are late.

[12:05] But we have worked with Shah Rukh Khan, Ranveer, Karina, Rohit, Anushka, Rishabh, Panchajli, and there are many more, over 200 of them.

[12:12] The good thing is that we have had our own journey of 6 years.

[12:16] 200 सेलिब्रिटी में से 190 को एआई क्या होता है?

[12:18] मैंने खुद उम में बैठ के समझाया है। मैंने उनको बताया कि देखिए यू नो इसमें ऐसे ऐसे हो जाएगा, फिर आपको टाइम नहीं देना पड़ेगा, फिर वीडियो अपने आप बन जाएगा, आपके टाइम की वैल्यू है, टाइम मल्टीप्लाय हो जाएगा, ऐसा हो जाएगा,

[12:31] वैसा हो जाएगा। मैं फर्स्ट सेलिब्रिटी वास् रणवीर सिंह यू नो हियर इन वी मेट हिं आई थिंक ऑक्टोबर 2020 एंड रणवीर ने बोला यार ये तो काला जादू कर दिया तुने मेरे चेहरे के ऊपर तो मैंने बोला सर रणवीर।

[12:42] So that's our business.

[12:45] It's just customer credibility.

[12:48] Move to what we do, right?

[12:50] We power communications.

[12:51] There are two kinds of communications, external communications, internal communications.

[12:56] External is simple.

[12:57] You have customers, prospects, channel partners, agents, what I

call dealer, distributor.

[13:02] India is a large country.

[13:03] D2C is, you know, footnote in most companies.

[13:06] Majority companies work through dealer, distributor, franchise partner, agent networks.

[13:11] you have to do communication with them almost every time.

[13:13] Internal communication, employees, teams, field force, sales rep, you know, pick up an Mr.

[13:18] for a Sun Pharma, a distributor for a Bajaj, a dealer for, you know, Rani Wilmer, et cetera.

[13:23] All those communications were e-mail text based.

[13:26] Now they are in video, localized to the language, personalized to the end recipient.

[13:31] Adoption goes up by 60%, revenue goes up, and you know, you kind of become sort of a community powers that.

[13:37] Apart from that, you power all the videos, training content, product explainers, TV, social media, brand films, almost everything that can be done in a video, by and large, I will talk about.

[13:47] We will show you some videos.

[13:48] So we will go with some 5-6 videos that will give you an idea about what is the kind of work Enterprise is doing and how they have pushed us to do the work that we are doing.

[13:58] We are a product of customer.

[13:59] As the customers came, so the videos were made.

[14:03] Not everything was imagined on day one.

[14:04] We will play a simple video.

[14:06] Have a look at it.

[14:11] नमस्ते नवीन जी, अदानी विलमर के सबसे बड़े डिस्ट्रीब्यूटर इन्सेंटिव प्रोग्राम उड़ान में पार्टिसिपेट करने के लिए आपका बेहद शुक्रिया। मैं तो बहुत एक्साइटेड हूँ। अरे, उड़ान आपके लिए गोल्डन ऑपच्युनिटी जो है,

[14:25] अपनी मेहनत और लगन से एक शानदार फॉरिन ट्रिप जीतने का मौका। 47 टन का

टारगेट कंप्लीट करने के लिए अगले 2 महीनों में आपको करना होगा सिर्फ और सिर्फ 41 टन। आपके और आपके ड्रीम अब्रॉड ट्रिप के बीच अब बस कुछ ही कदमों की दूरी है।

[14:51] मैं मेहनत करते रही, मुझे पूरा भरोसा है, आप ये कर दिखाएंगे और बहुत सिंपल वीडियो है। अडानी विलमर फॉर्चून ऑयल, वन एंड थ्री ऑयल, एयरवे इंडिया, सोल्डियर्स, अडानी विलमर, 35,000 डिस्ट्रीब्यूटर्स अक्रॉस इंडिया। हमारे से पहले क्या होता था, उनकी जो मार्केटिंग मैनेजर है, नियति। वो अपने हेड ऑफिस से सारे डिस्ट्रीब्यूटर्स को एक ईमेल लिखती थी,

[15:06] इंग्लिश में ईमेल लिखते हैं। गुजराती डिस्ट्रीब्यूटर को भी इंग्लिश में जाता है, तमिल को भी इंग्लिश में जाता है, बंगाली को भी इंग्लिश में जाता है। उन्हें बताया जाता है कि, you know, "उड़ान इज़ अ स्कीम, प्लीज़ पार्टिसिपेट, अडॉप्ट दू स्कीम, this is your incentive," ब्ला ब्ला ब्ला। Now, this is a monthly sort of, you know, communication, sometimes about your target, you know, X आटा, Y गेहूं,

[15:24] Z तेल पेंडिंग है, या फिर ये इंसेंटिव करेंगे तो ये मिलेगा, ये मिलेगा, वो मिलेगा। जब से वो हमारे साथ आए, it's been 3rd year running.

[15:30] Every form of those communications have become video first.

[15:33] They take up a face because they have money.

[15:35] They will spend on a celebrity.

[15:37] If you don't have money, you can take up your CEO's face or a general face, and they'll train a model, and then you'll go out and talk to your distributor.

[15:45] Adoption rates of schemes are up 60%.

[15:47] तो अगर पहले 35,000 डिस्ट्रीब्यूटर में से 10,000 या 12,000 उसकी कम्युनिकेशन पे क्लिक करते थे, वो नंबर अब 20,000-22,000 हो चुका है। अगर X लोग अडॉप्ट करते थे, तो Y हो चुका है। क्योंकि एक आम आदमी को समझ में आता है कि जब मेरे से मेरी भाषा में बात की जाए, क्या समझाना जाए। As you grow mass, it matters a lot more, right?

[16:03] So all their comms are done with this level.

[16:05] This is the same exercise, by the way, for an Asian paints with dealers who work with us, for a, you know, JSW paints, for a Burjer, for a, you know, Bajaj Finance with their distributor network, for Zomato, for their partners, etc., multiple.

[16:18] So जिसके पास भी एक intermediary relationship है, it could be what I call dealer, distributor, agent, channel partner, franchise, etc., etc., तरह-तरह के नाम हैं। वो सारे comms अब वीडियो फर्स्ट के नेचर होते हैं। I'll play you another video, which is also interesting, where Axis Max—like, now they have

money, they have Rohit Sharma as a celebrity, but यहाँ पे पब्लिक मार्केट कंपनी है,

[16:39] सुमित मदान उनके CEO हैं—उन्होंने बोला, "यार, मेरे एजेंट्स को या मेरे डीलर्स को तो मैं खुद ही बात कर लूँगा, रोहित शर्मा क्या बात करेगा। तो आप मेरा ही अफवाह बना दो।" So we created an avatar for him, and now he does regular comms, you know, for all internal people with his avatar.

[16:54] Have a look at this.

[16:56] Dear Ayaz Khan, congratulations on achieving this remarkable milestone as an MDRT winner.

[17:01] This globally respected recognition, earned by barely 1% of insurance professionals worldwide, reflects the deep trust families place in you, your integrity, and your unwavering commitment to protecting what truly matters.

[17:14] Your achievement not only strengthens Axis Max Life Insurance but also raises the bar for our entire industry.

[17:21] I am confident this is just the beginning, and I look forward to seeing you scale even greater heights in the year ahead.

[17:28] Thank you for the care, discipline, and conviction you bring to every family you serve.

[17:34] सुमित थोड़े स्टाइलिश भी हैं। उन्होंने अपने तीन-चार अफवाह बना रखे हैं, एक सूट में, एक फेस्टिव में, एक अलग तरीके से। So depending on the season, he'll wear a jacket, and then there's an avatar talking to you in that season, so it looks very fresh and content-like.

[17:46] So there's an example of where if you, you know, if you want to go even sort of personal leadership are making, he's not the only one.

[17:52] There are many CEOs now who come into us and say, "Please create my avatar, I want to talk to my team that way, I want to talk to my agents that way, I want to talk to my distributors that way," and it's almost going to become mainstream where in future your investor updates are going to happen that way, and you know, you're going to talk to your sort of people in video form.

[18:10] Dear.

[18:10] एक और अच्छा use case है collections, क्योंकि आप BFSI करते हैं। BFSI में

सबसे बड़ी बात यही होती है कि लोन देना बहुत आसान है, लोन इकट्ठा करना बहुत मुश्किल है, right?

[18:19] And you know, we work with many BFSI clients.

[18:22] I'll show you a case study which is, you know, live.

[18:25] Suppose आपने लोन लिया है किसी बैंक से, NBFC से, and आप obviously repay नहीं कर रहे हैं, क्योंकि किसी को लोन repay नहीं करना होता है। तो आपको पहला मैसेज कैसे आएगा?

[18:34] पहली बार आपको बहुत प्यार से reach out करेंगे, something like this.

[18:38] नमस्ते अभिषेक कुमार सिखानिया जी। हम आशा करते हैं कि आप और आपका परिवार स्वस्थ और कुशल हैं। बस आपको एक छोटा सा रिमाइंडर देना था कि आपकी ईएमआई दिनांक 17 जनवरी को ड्यू है। ये 8,88,888 रुपये की ईएमआई है, विस्तार लोन के लिए। मैं समझती हूँ कि जिंदगी काफी बिजी हो सकती है, इसलिए ये सिर्फ एक हल्का सा रिमाइंडर है, अगर शायद आपके ध्यान से निकल गया हो। अगर आपने पेमेंट कर दिया है,

[19:04] तो कृपया इस मैसेज को इग्नोर कर दें। अगर आपको किसी चीज़ में मदद चाहिए।

[19:09] You get it, right?

[19:10] So polite, nice female, gentle, calm.

[19:12] और फिर इसका एक ग्रेडिएंट होगा। अगर आप पहली बार में नहीं मान रहे हैं, तो दूसरी बार में, तीसरी बार में, चौथी बार में। And मैं आपके लिए fifth play करता हूँ, which is simpler.

[19:22] नमस्ते अभिषेक कुमार सिंधानिया जी। मैं personally इसलिए संपर्क कर रहा हूँ क्योंकि आपका लोन विस्तार फाइनेंस के साथ अब 90 दिन से ज्यादा ओवरड्यू हो चुका है, और अब अधिकारिक रूप से एनपीए मार्क हो गया है। पिछले कई हफ्तों से हमने आपसे संपर्क करने की कोशिश की, लेकिन न पेमेंट प्राप्त हुई और न ही कोई रिस्पॉन्स मिला। इसलिए ये बताना जरूरी है कि ये अब सिर्फ रिमाइंडर नहीं है;

[19:45] लीगल रिकवरी एक्शन शुरू हो चुका है। इसका अर्थ ये है कि आपका लोन अब सीरियस डिफॉल्ट स्टेटस में है, जिसका सीधा असर आपके सिबिल स्कोर और क्रेडिट हिस्ट्री पर पड़ रहा है। आपके साइन किए हुए एग्रीमेंट के अनुसार लीगल स्टेप्स लिए जा रहे हैं।

[20:00] So you understand, right?

[20:02] So ideally, if NBSC had the power, they would go to every customer and say, "Mera paisa wapas karo," या "मेरा इंटरेस्ट वापस करो," but that's not going to happen, right?

[20:10] Therefore they create these avatars.

[20:12] But now I want to do the talking and communicate the message the way they like.

[20:15] This can be then done in multiple languages, with different kind of facets.

[20:19] Avatar, by cohorts.

[20:20] Make my people say, "I'm a large platform, my young audience deserves a different face, my older audience deserves a different face."

[20:27] Older audience which are going for, you know, family sort of event deserves a different face.

[20:31] Younger which are going for honeymoon deserves a different face.

[20:34] Younger who are going for, you know, Airbnb stays deserves a different face, right?

[20:38] Every communication is getting very, very personal, right, at that level, right?

[20:42] Now, this can also extend to what I call conversational stuff.

[20:45] This I like a lot because this is first time where we're going to TV commercial grade.

[20:49] Client here is श्रीराम लाइफ इंश्योरेंस, you know, big company as a group, right?

[20:53] Let me play the video first, and then we'll talk about it.

[20:57] आपके पास कौन सी पॉलिसी है?

[20:59] मेरा लाइफ इंश्योरेंस लाइफ का गेम ओवर होते ही नॉमिनी को फुल पेआउट देता है। पेआउट सिर्फ लाइफ के बाद क्यों?

[21:06] किसी गंभीर बीमारी होने पर भी मिलना चाहिए। लेकिन मिलता नहीं, सर। अब मिलता है। श्रीराम लाइफ फ्लेक्सी शील्ड पॉलिसी गंभीर बीमारी के डायग्नोसिस पर 50% कवर तुरंत देता है, और बाकी कवर चलता रहता है बिना किसी प्रीमियम के। जरूरत जैसी, पॉलिसी वैसी। पूरा टीवी कमर्शियल एआई से बना है। राहुल द्रविड़, and the gentleman who's at the side, shot differently, brought on the table.

[21:31] They are doing what I call conversation about a complex product like insurance, explaining it in simple terms, explaining the terms, you know, one by one.

[21:39] Normally एक टीवी कमर्शियल आपको अगर शूट करना होगा, broadly, राहुल

द्रविड़ की फीस हटा दीजिए। उस फीस के अलावा भी, broadly, 50 से 60 लाख लग जाएगा, depending on the agency you hire.

[21:47] And you can do one commercial, and then, you know, you'll spend it into multiple markets.

[21:52] Because you'll play across.

[21:53] You know, मीडिया में क्या होता है?

[21:55] You spend 10 rupees in content creation, 90 goes in distribution of that content, right?

[21:59] So you spend 50 lakhs in creation, 5 crores in distribution.

[22:02] Now, what's happening is, we've created this video, which is, you know, done in 10 times or 15 times lower cost, probably about 3 lakh to create this video.

[22:10] And now they will not just create one video, but 10 different videos of different policies that they have.

[22:16] As a company, you don't have one product.

[22:18] You have infinite products.

[22:19] And then you will convert it to multiple languages, which is 8 languages.

[22:23] So now you're playing 20 different commercials in different markets.

[22:26] You're able to articulate the product better, you know, sharper, scalable, right?

[22:30] यहाँ पे बहुत बड़ा use case जो unlock होता है, वो ये होता है कि आपको कभी भी दोबारा content बनाने के लिए planning production cost के बारे में सोचना ही नहीं है। आप एक बार आ जाइए, उसके बाद, you know, the life becomes like Blinkit, you know, it's like on-demand content generation.

[22:43] That's happening, right?

[22:45] अब आगे बढ़ते हैं। Multiple languages में कर सकते हैं। एक अच्छी चीज़ हमने unlock की है over the journey is like, you know, like I told you, we were 6 years in the business, right?

[22:53] So what were we doing for that long?

[22:55] AI happened only 3 years ago, right?

[22:57] What were we doing for the first 3 years, right?

[22:59] हमने देखा कि, यार, हमने जब start किया था, so you know, my journey was, I was a big celebrity fan, which obviously can, you know, you can inject from that, right?

[23:07] So I did Crash Rohit Sharma's wedding in St.

[23:09] Regis in Bombay in December 2016 to meet Virat.

[23:11] I have a selfie with him.

[23:12] I have a National tennis player, I have an autograph from Roger Federer on my cap.

[23:16] So I always, when I quit Warbuck, I always thought that, look, you know, celebrities are aspirational, not accessible.

[23:22] And the definition of you being a celebrity is like आपके समय की value है। बात पैसे की नहीं, you can spend money, but the value of time is imperative.

[23:30] So we always thought first principles कि, यार, अगर हम एक चेहरा, एक celebrity—and celebrity doesn't mean Bollywood, it means, you know, even Mukesh Ambani is a celebrity, you know, or सुमित मदान is a celebrity with Axis Max.

[23:41] Like, anyone whose time is valuable is a celebrity.

[23:44] हमने सोचा, कुछ ऐसा होना चाहिए, यार, कि celebrity का अगर 10 मिनट ले लिया जाए, तो उसका चेहरा को हम कुछ clone करके, technologies से बना के, हम उनको physically उस equation से बाहर रखें। And can we scale using technology, right?

[23:55] That was our idea back in 2020.

[23:57] There was no AI.

[23:58] We were—serendipity happened, we met Ronny Screwalla, you know, good guy in media, technology, and sort of, you know, has a lot of money.

[24:05] I think that's most important.

[24:06] So he said, "आप बहुत बढ़िया हैं, अच्छे लड़के आए हैं, चलो आपको पैसे देते हैं, बनाइए technology."

[24:11] ठीक है, took an asymmetric bet, raised about 3 million dollars,

asymmetric bet, pre the world of AI, hired our first engineer in Israel, second engineer in Ukraine, third IIT Bombay, fourth IIT Kharagpur, fifth IISC Bangalore। उससे, यार, एक problem statement है: अगर एक बार रणवीर को पकड़ के 10 मिनट लूंगा, उसके बाद दोबारा कभी टाइम नहीं देगा वो। वीडियो बनाने हैं, बहुत सारे। So what we unlocked was,

[24:31] you know, give me a face, and I'll give you back that time.

[24:34] And the idea was very first principle, you know, like a baniya buddhi कि अगर आपके, आपके समय की value है, और मैंने आपका समय ही multiply कर दिया, तो फिर multiplied समय की भी value होनी चाहिए। और अगर मैंने multiply किया, तो मेरा success भी होना चाहिए। भाई, कुछ आप लोगे, कुछ हम खाएंगे। So that's the, that's the zone that we played in, which today plays out in almost every celebrity, you know,

[24:54] work that's happening.

[24:55] Big companies like SBI Life, you know, they basically signed up these two celebrities, Ravinder Jadeja and Rishabh Pant, for 3 years with their AI rights.

[25:03] And then they floated referendum internally to say, "बताइए कि आपको क्या-क्या content चाहिए।" And you know, normally the power of content is only in the hands of two marketing guys, but now HR also came by and said, "यार, employee morale के लिए भी अगर Rishabh Pant कुछ बोल दें, तो अच्छा रहेगा," right?

[25:18] ठीक है, क्योंकि भाई, कब तक हम ही उनको, you know, रंगोली बना के दिखाते रहेंगे?

[25:22] ठीक है, तो हमारे पास आई कुछ 900 ad film, 900 ad films to say, "यार, हम तो पूरे साल, पूरे महीने Rishabh से बनाएंगे वीडियो।" अब आपने videos देख लिए, तो मैं video दोबारा नहीं दिखाऊंगा। पर problem statement क्या था?

[25:32] कि हमने शूटिंग तो खड़े हो के की थी, क्योंकि हमारा तो objective ये था कि हम time multiply करेंगे। तो Rishabh ने पहना है blue coat, Jadeja ने पहना है red coat, whatever, orange coat। उन्होंने बोला, "यार, सारे वीडियो खड़े रह के थोड़ी बनेंगे।" फिर तो मजा ही नहीं आने वाला। फिर तो लगेगा, "अरे, इन्होंने पता नहीं क्या कर दिया है।" So we took an attempt to say, "Okay, look,

[25:50] if the celebrities were short-standing, could we make them sitting, right, and have a look at what we are doing?"

[25:55] नमस्ते दोस्त, कैसे हो?

[25:57] क्या भाई, हमें यहाँ देखकर खुश हो गए?

[25:58] तो पहली बार उन्हें हमने खड़े थे और बिठा दिया। वो आज तक शूट पे बैठे नहीं थे। फिर उन्होंने बोला, "बिठा सकते हो," तो you know, कपड़ों भी, कपड़े भी change कर सकते हो। तो हमने बोला, "चलो, red की जगह कुछ और पहनाते हैं।" And you know, the client's demands never stop, right?

[26:10] So बोलते हैं, "ये भी कर सकते हो," तो ये भी कर सकते हो। And then, you know, this independence, we released a film.

[26:15] I'll play the film for you.

[26:16] You just have a look at it, you'll understand what technology has done, right?

[26:20] आज़ादी की फीलिंग सिर्फ़ खुशी नहीं, कई तरह की अनकही गारंटी भी देती है। हाँ Jolly, जैसे गारंटी सपनों के साथ जागती उम्मीद की। अपनों के चेहरों पे खिलती 2 इंच एक्स्ट्रा मुस्कान की। सेकंड इनिंग्स में फ्रंट फुट पे खेलने के हौसले की। फिक्र से दूर जाके सफर में मिलते सुकून की। जब कोई हमें दिल से आज़ाद फील कराता है,

[26:46] तो इंडिया को मिलती है एक सुनहरे कल की गारंटी। और उस सुनहरे कल के लिए। करो पूरे अपने इरादे। अपनों से किए सभी वादे।

[26:56] एसबीआई लाइफ। अपने लिए, अपनों के लिए। ये पूरी फिल्म 5 दिन में बनी है एआई से, without any celebrity shoot। मैं सच बताऊँ, आप शूट करवाओगे तो भी वो इतना अच्छा coordinate नहीं कर सकते आपस में। You know, you go and talk with a cricketer, you'll know very well, right?

[27:10] So look at the time to market.

[27:12] That's shrunk to almost zinch.

[27:13] Look at the ability that a marketing guy now has today to produce content in a very technical way.

[27:18] I'd say, you know, the cost of creating an additional video is going down to zero.

[27:23] And therefore, I have that power now to use my content budget in the ways I wouldn't otherwise.

[27:28] I will talk to every of my customer the way I would like.

[27:31] And you know, I would almost kind of go down the human route of talking, otherwise creating, creating sort of films, right?

[27:37] So I'll give you an example of what SBI did.

[27:39] Big example, बजाज फाइनेंस, you know, सबके सारे स्टॉक मार्केट वालों का darling है, you know, being sort of the multi-bagger.

[27:46] They are our largest customer.

[27:47] I kept them till the lend.

[27:49] We have about 3 more slides, right?

[27:50] बजाज फाइनेंस came to us in October 24.

[27:53] They saw us because, you know, as we were, you know, a little bit of, like, start of our company, right?

[27:58] जब हमने शुरुआत की थी, तो हमने consumer lens से शुरुआत की थी। हमें लगा था, celebrity का time multiply करेंगे, customers को वीडियो देंगे, fans को वीडियो देंगे। You may have seen some ads of करीना कपूर wishing people happy birthday, or रणवीर सिंह, you know, wishing people sort of anniversary.

[28:12] We built that product out.

[28:13] As our videos were sort of going by, and we were scaling up platform, right, we accidentally met दीपेंद्र गोयल। उन्होंने हमारी consumer app use करी। And then he called me in March 24.

[28:22] He said, "यार, बहुत अच्छा, आपने तो एआई first product बनाया, पर आप तो बिल्कुल भी, you know, marketing नहीं करते हो, famous नहीं हो। ऐसा करो यार, brands के साथ काम करो। Brands में बहुत बड़ा market है। You know, you will unlock something of very tremendous value."

[28:34] दीपेंद्र led ज़ोमैटो becoming our first customer.

[28:36] ज़ोमैटो obviously is a flagship of marketing, as you know.

[28:39] So they put a rubber stamp on something, and people saw, okay, this is a new norm, right?

[28:44] Seeing that, बजाज फाइनेंस came to us, October 24.

[28:46] Very, very credible, high-quality, AI-forward company.

[28:49] Whoever follows their earnings call, know that they are the market leaders in adoption of AI in enterprises in India, by far, you know, by far.

[28:58] And it's led from संजीव जी and राजीव जी, you know, at the top.

[29:01] They have created, you know, fast.

[29:03] We are in, we are in September, but go back to the March 26 of this year.

[29:08] From October 24 to March 26, 18 months में, बजाज ने अपनी पूरी कंपनी को, what I call, कर दिया है video-wise, right?

[29:14] They've coined out this term called video-ization.

[29:17] You know, they've hired a team of 150 people to video-ize every customer journey.

[29:22] Start हुआ था EMI sales से, summer promos से, product nudges, gold loan, personal loan, cross-sell, adoption, event participation। हमने उनके साथ मिलके कुछ 17 लाख वीडियो बनाए, डेढ़ साल में। And the imperative of that was that this year, in April, they renewed our contract for over 1 crore videos.

[29:39] तो 17 लाख वीडियो इतने अच्छे बन गए कि, you know, अब कंपनी बोल रही है, भाई, और आगे जाते हैं, और 1 crore वीडियो बनाते हैं। This is a slide to show you on what depth can you work with an enterprise। हम दूर से देखते हैं, तो वीडियो लगता है, वीडियो ही तो है। But वीडियो, वीडियो नहीं है। Short, long, pixel, resolution, phase, non-phase, cinema, console। Product conversation blah blah blah blah blah.

[30:03] You know, so when you go, you'll get something like that.

[30:07] One Bajaj Finance, 1.5 crore video, 2000 cinematic video, 10 vertical, 20 active use case, we've worked on 103 POCs in that company.

[30:17] I mean, you know, I don't understand how many videos we have to make, but you know, sales.

[30:23] Distribution, loans, adoption, branding, social media.

[30:27] Good thing is that Bajaj, anyone will watch the video.

[30:29] Every quality, you know, some bad quality also exists because there are budgets.

[30:32] Some very good quality also exists because there are big budgets, right?

[30:35] All of those videos by and large we create.

[30:37] Because we're in Bombay, I'll just show you one and then we'll end up sort of in last slide.

[30:42] Just have a look at this one, right?

[31:25] Mumbai ki barish aur aapke beech sirf khushiyan ho ni jayegi.

[31:34] Zahir se baat hai video aisi hi banaye.

[31:36] So everything that we create is with AI, right?

[31:38] You know, last segment, this is what the work we've done with enterprises, very humbled about what kind of reception we've had.

[31:44] We onboarded our first customer in form of Zomato in...

[31:47] March 24th, April 24th, in the last two and a half years, about 150, 148 customers, to be precise, across all categories coming by, right?

[31:56] But this is all happening, what's the future, right?

[31:58] What I believe is, as any products get better, customers always want faster, cheaper, better.

[32:06] These are the three big themes.

[32:08] Jay Baersdorf says, don't ask me what will happen in 10 years, it's very hard.

[32:13] But what I can tell you is, what won't happen in 10 years.

[32:15] Customer will never come and say, Give me better, give me slower, give me faster, give me cheaper, give me expensive.

[32:22] That's not going to happen, right?

[32:23] So, we apply the same principles to say, What can video be?

[32:27] How can it be faster, better, smarter, cheaper, etc.?

[32:32] We're taking a valiant attempt.

[32:33] This is not live, this is a demo.

[32:36] We're creating a demo where we say, What if video, which was asynchronous, I'm sending you a video right now.

[32:45] becomes synchronous.

[32:46] You know, we have done this in voice, you know, world has got enough voice calls, you know, every phone rings with a voice call where AI is talking and those are what I call push-based sales.

[32:55] But what if when you really need a pull, when you have a question and you need an advice, you're a farmer in some town and you want to talk to some mentor helper, you've taken a loan from Bajaj, you genuinely have five questions, at that time there is no AI at play.

[33:09] Then you'll have to go to their dialer and press the button to reach

out.

[33:13] I was at insurance, Hi Raj, welcome to Bajaj Finance.

[33:33] Loan explore karna ho ya investments ki baat karni ho, bataye kaise help karoon.

[33:38] Meri liye konsa loan options available hai.

[33:41] Gold loan and a pre-approved personal loan are available for you.

[33:46] Which one should I start with?

[33:49] Tell me about the gold loan.

[33:49] You have two options: Ten lakhs at 9.5% with twenty-one thousand rupees per month EMI or six lakhs at 8.9% with twelve thousand five hundred rupees per month EMI.

[34:02] How long will the disbursement take and what collateral do I need?

[34:07] राज जी। liveness check done.

[34:36] Now pan card camera in front of you, hold it, excellent.

[34:41] KYC complete.

[34:44] This is not a demo, we are doing it in real.

[34:46] It's not deployed yet, but you will be able to soon talk to a video like you would talk to your relationship manager, doctor, coach, teacher, etc.

[34:55] It will be answering you in real time.

[34:56] We will deploy the best agency systems possible.

[34:59] You know, we speak in common language, like we have multiplied the time of celebrities.

[35:03] So you know as individuals, you will be able to create your avatars, you will have digital agents, video agents talking to you, a sort of a question, right?

[35:13] And my presentation, I think next time hopefully an AI avatar will take this presentation.

[35:17] But till then any questions if you have, happy to answer them.

[35:21] Excellent.

[35:22] Thank you very much, Vish.

[35:23] There are a lot of questions.

[35:24] Let me get started with them in the interest of time.
